

Badge 3 LEPL2020 Briec Thibaut de Maisières

- What are your expectations for this workshop?

For this dinner at the *Martin's Hotel* I am expecting to discuss in a more informal environment (than during a job interview, for example) with representatives from different companies.

- What reasons motivated you to attend this workshop?

The fact that other students in the same situation as I am into will be attending the workshop gives me more excitement than stress. Not only the companies themselves, but also the experience of their representatives motivates me to attend to this workshop. I am therefore looking forward to meet representatives of companies such as SAFRAN and GSK.

- What questions do you have in mind in preparation for this workshop?

Other than questions regarding the company's product and the position and tasks of the representatives in the company, I also intend to ask the representatives about their career path : How many companies have you already worked in? What motivated you to transition to other jobs internally or externally? How do the relationships with your employer look like? Do you have any advice for an inexperienced engineer who recently graduated?
